How uploading for a Minor

If you need to upload a vaccination card for a minor, you’d go through the same process, but you’d choose their name to upload under. If you can’t upload under the minors name, instructions below.

First, go to your Profile. At the bottom of the profile page, click on Travel Party Members, this is where you can add minors to the account/profile, Submit when you’re done. Create a new Trip, fill out the details, and at the bottom, you should be able to checkmark the minors added. Submit when done, you will now be able to upload under their name.

**NOTE:**
If you created a trip first and added the minors after, they will not appear in your trip. You will have to delete the trip and create a new one.

If you have done the health questionnaire for any given trip, you will not be able to delete it, you will need to create a new one to add to your minors.

How do I get the QR code?

The QR code comes from completing the Health Questionnaire which is available the day before your flight. From first logging on, click the Health Questionnaire button, after answering the questions, signing, and submitting, you'll get the QR code. It’s both sent to your email, and will also be in Trips. From first logging on, go to Trips, click the trip, and when it opens, the QR code should be there, it’s black and yellow. You can print it out and bring it with you as well.
